User stories

ID	User Role	Detailed User Story Requirement	Acceptance Criteria / Concrete Details	Priority
CAT-01	Operations Manager	As an Operations Manager, I want to add and maintain catalogue entries with full product specifications...	Criteria: Must support fields: Item ID, Description, Package Type (box/bottle), Unit (Caps/ml), Units in a pack, Package Cost (£), and initial Availability. +1	High
CAT-02	Operations Manager	As an Operations Manager, I want to configure a specific "Stock Limit" (minimum threshold) for every catalogue item...	Criteria: The system must store a non-negative integer for each item that serves as the trigger for low-stock warnings and replenishment reports. +2	High
CAT-03	Warehouse Staff	As a staff member, I want to increment the "Availability" count for specific items when new shipments are delivered...	Criteria: The system must allow search by Item ID or keyword to locate the correct record and update the current number of packs in stock. +2	High
CAT-04	Admin / Ops Manager	As a privileged user, I want to receive an automated warning on my home screen for any item where Availability falls	Criteria: This check must occur "every time they use the system" (at login or dashboard refresh) to ensure immediate awareness of shortages.	High

		below the Stock Limit...		
CAT-05	Operations Manager	As an Operations Manager, I want to generate a "Low Stock Level Report" that calculates a "Recommended Min Order"...	Criteria: The report must include Item ID, Description, Availability, and Stock Limit. It must calculate a suggested order quantity to bring stock to 10% (or a configurable 10-50% parameter) above the limit.	Medium
CAT-06	Merchant	As a Merchant, I want to see the real-time "Availability" of items while filling out my electronic order form...	Criteria: While searching the catalogue, the merchant must see the current pack count available for purchase, but not the internal "Stock Limit" field.	High
